

Erratum

In the minireview entitled “Yes, but Do They Still Get Headaches?” by Dewitt and Smith (*Cell* 83, 345–348, 1995), the authors erroneously stated that only two instances of nonsteroidal anti-inflammatory drug (NSAID)-induced apoptosis had been reported previously. Piazza et al. (*Cancer Res.* 55, 3110–3116, 1995) and Schiff et al. (*J. Clin. Invest.* 96, 491–503, 1995) have shown that in the HT-29 cell line, sulindac sulfide also induces apoptosis.
